component container, the identifier being electronically stored in the component and read therefrom for printing on the labels.

SUB B3
AA2
13. (Amended) The article of manufacture of claim 1 wherein the first label can be removed from the component container and attached to a device in which the component is installed.

4. (Amended) The article of manufacture of claim 3 wherein the second label can be removed from the component container and attached to a package in which the device is shipped.

SUB B3
AA3
19. (Amended) An article of manufacture comprising:

a base label having a designated area thereon to receive an identification label;
and

first and second identification labels removably attached to the designated area of the base label, each identification label having printed thereon an identifier that uniquely identifies a component inside a component container to which the base label can be attached, the identifier being electronically stored in the component and read therefrom for printing on the identification labels.

SUB B3
AA4
21. (Amended) The article of manufacture of claim 19 wherein the first label can be removed from the component container and attached to a device in which the component is installed.

22. (Amended) The article of manufacture of claim 21 wherein the second label can be removed from the component container and attached to a package in which the device is shipped.
